DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 22 December 2003 has been entered.

Claim Rejections - 35 USC § 103

- 2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 3. Claims 29-48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith et al in view of Boguraev et al. Smith et al disclose a computer-implemented ordering system comprising an interface (100) adapted to provide a representation of a consumer item and an option associated with the item (see Figures 7-14), and a presentation module (127) adapted to provide a preview representation of a consumer item with the option in response to a user positioning a cursor over an icon and clicking on the icon (see col. 9, lines 13-23 and col. 11, lines 6-14). Smith et al disclose clustering option that is dependent on previous selections (col.11, lines 6-14). Smith et al further disclose a presentation module adapted to provide attribute data and statistical information

Application/Control Number: 09/439,626

Art Unit: 3627

associated with the consumer item (see Fig. 15). The presentation module is automatically updated with the preview representation of the consumer item updated with the option (see col. 9, lines 24-64). The user is prevented from selecting options that are incompatible with previous selections (col. 9, lines 58-64).

Smith et al do teach the step of updating the preview in real-time.

However, real-time updates are common in the art, and it would have been obvious to one of ordinary skill in the art at the time the invention was made to employ the step of updating the preview in real-time to meet consumer needs.

Smith et al do not teach the step of providing an audio preview. However, sound effects are common in the art, and applicant's disclosure of "sounds associated with the various payment and shipping options (such as an airplane sound for shipping by air)" (p. 16, lines 23-25) is also common in the art. It would have been obvious to one of ordinary skill in the art at the time the invention was made to employ the step of providing an audio preview with the invention of Smith et al to provide a further indication of the option being selected.

Smith et al do not teach that the presentation is updated in response to a user clicklessly positioning a cursor over an icon. Boguraev et al teach a dynamic presentation that is updated when a user rolls a mouse over an icon (see col. 22, lines 20-44). It would have been obvious to one of ordinary skill in the art at the time the invention was made to employ the teachings of Boguraev with the invention of Smith et al to update the presentation when a user

clicklessly positions a cursor over because it is more efficient than requiring a user to click on an icon.

Response to Arguments

4. Applicant's arguments with respect to claims 29-48 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Celebiler discloses a presentation that is updated when a user rolls a mouse over an area.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bryan Jaketic whose telephone number is (703) 308-0134. The examiner can normally be reached on Monday through Friday (9:00-5:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Olszewski can be reached on (703)308-5183. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
